PROJECTS

Watchlister
Marathon - Summer 2020

- Developed a Canadian stock watch list in **Python** to transmit real-time stock data
- Implemented the entire project while running a full **Marathon**
- Utilized SMTP to broadcast alerts through email and sms

Compiler
UWaterloo - CS 241

- Built a compiler for a subset of the C++ language in **C++**
- **Scored 106%** on this final project
- Implemented all stages including Scanning, Parsing, Context Sensitive Analysis, Code Generation and Optimization
- **Ranked top 5** for best optimization in a class of **350+ students**

Biquadris
UWaterloo - CS 246

- Co-developed the **Tetris** game with many additional features
- Implemented the program utilizing **object-oriented programming patterns** in **C++**
- **Scored 103%** on this final project by achieving all requirements and implementing **bonus** features

EXPERIENCE

Software Developer
Squarepoint Capital

📅 May 2021 - Aug 2021   📍 Montreal, Canada

- **Independently** developed ETL pipelines supporting quant trading strategies across global markets allowing over **$1M** in recurring revenue
- **Designed and developed** a file system client to standardize all file operations improving infrastructure and business visibility
- **Supported** real-time production issues across all global data engineering projects developed with **Python, PostgreSQL, Nomad and Bamboo**

AI Developer
Intact Financial Corporation

📅 Sep 2020 - Dec 2020   📍 Montreal, Canada

- **Independently** developed a **Spring Boot** application with a Vaadin framework to manage **Kafka** error messages produced by the team's services in **Java**
- **Restructured and developed** the team's testing frameworks and scripted tools to generate large testing data sets using **Python**
- **Mentored** teammates with less software development experience and ensured **best practices** were respected in testing software

SKILLS

Languages:

`Python` `C++` `C` `Java` `JavaScript` `TypeScript` `SQL` `R` `Racket` `MIPS`
